

About the Syllabus

Marco Zennaro, PhD

The Abdus Salam International Centre for Theoretical Physics

mzennaro@ictp.it

AIEng4D Co-Chair

Marco Zennaro, PhD

Researcher at the International Centre for Theoretical Physics

Coordinator of the Science, Technology and Innovation Unit

Focal Point for the ITU Centre of Excellence in IoT, Big Data and Statistics

Sensemaking Senior Research Fellow of the MIT International Development Initiative

Visiting Professor at Kobe Institute of Computing (KIC) in Kobe, Japan

AIEng4D Co-Chair

IEEE Senior Member and an ACM Senior Member

What will we learn?

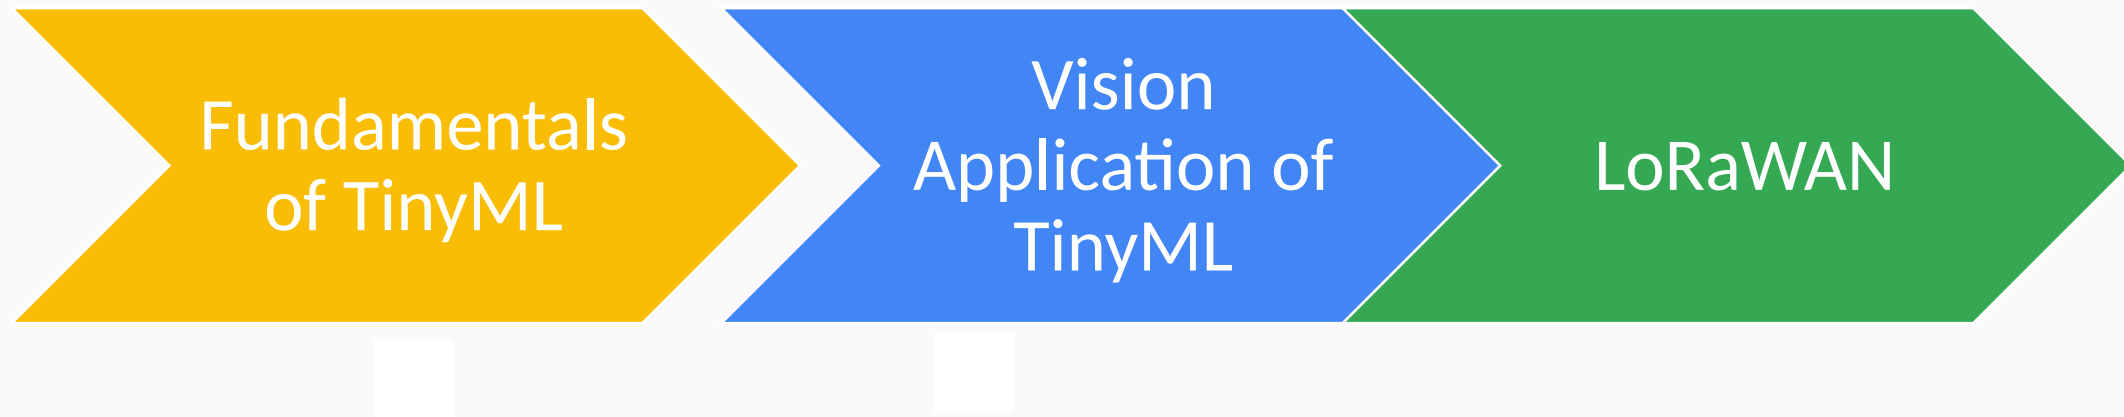

What will We learn?

What will We learn?

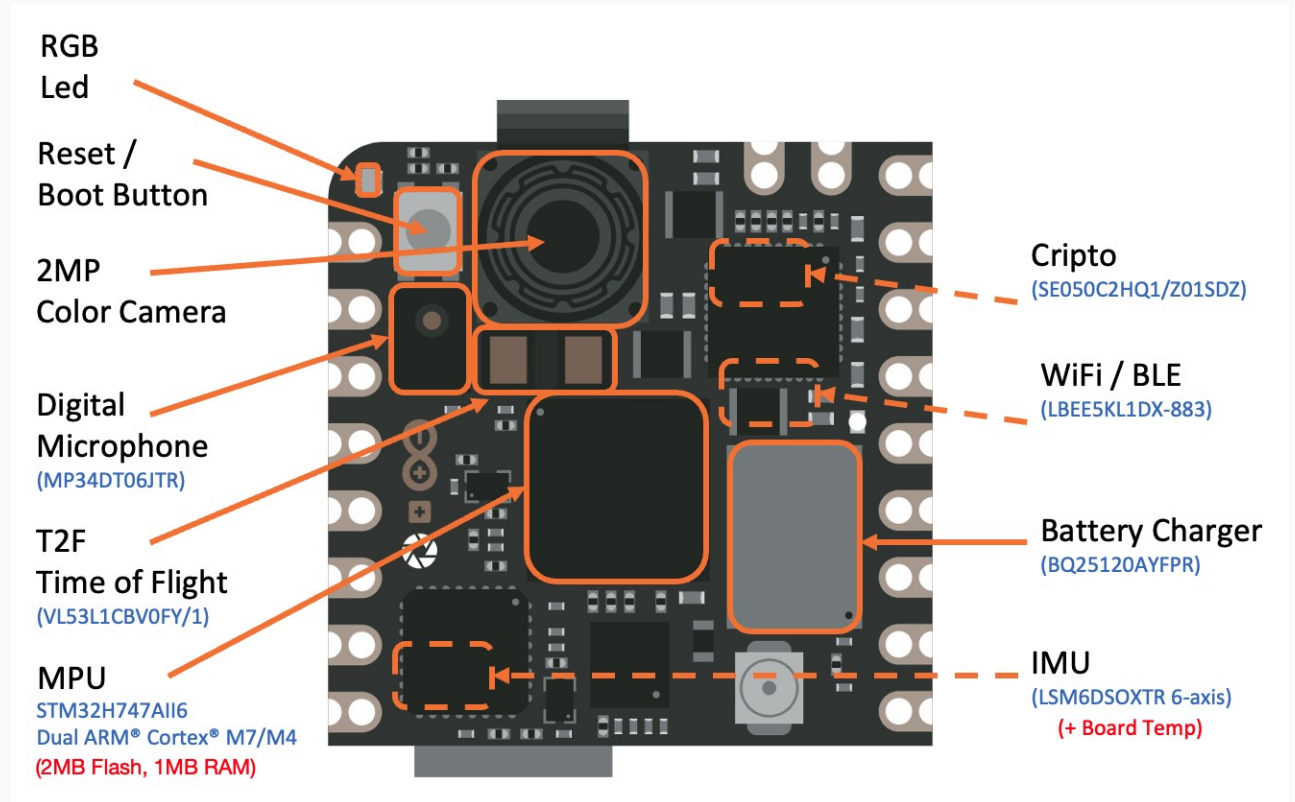

What will We learn?

How are we going to get there?

Thank you, Prof. Marcelo Rovai!

Hardware

Arduino Nicla Vision

Edge
Device

& Sensors

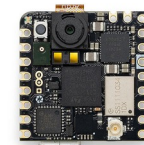

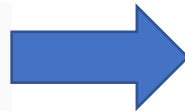

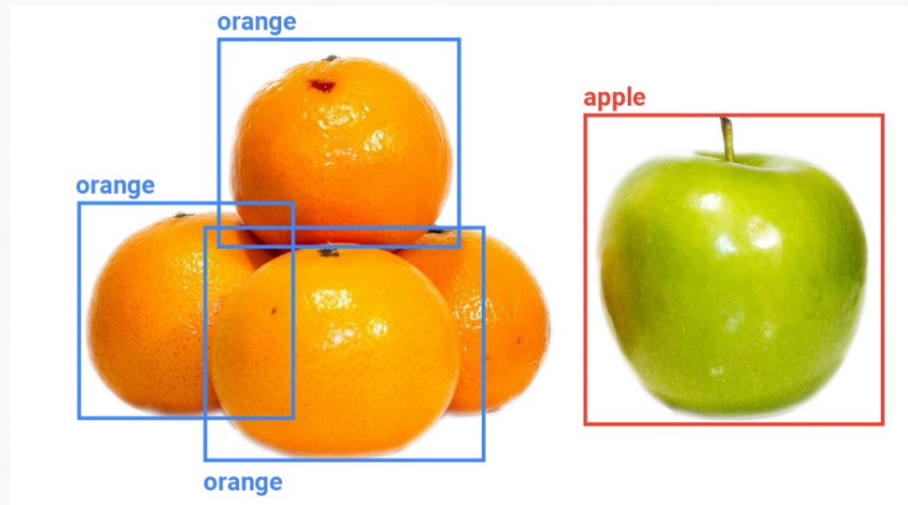

Hands-on Activities

Speech

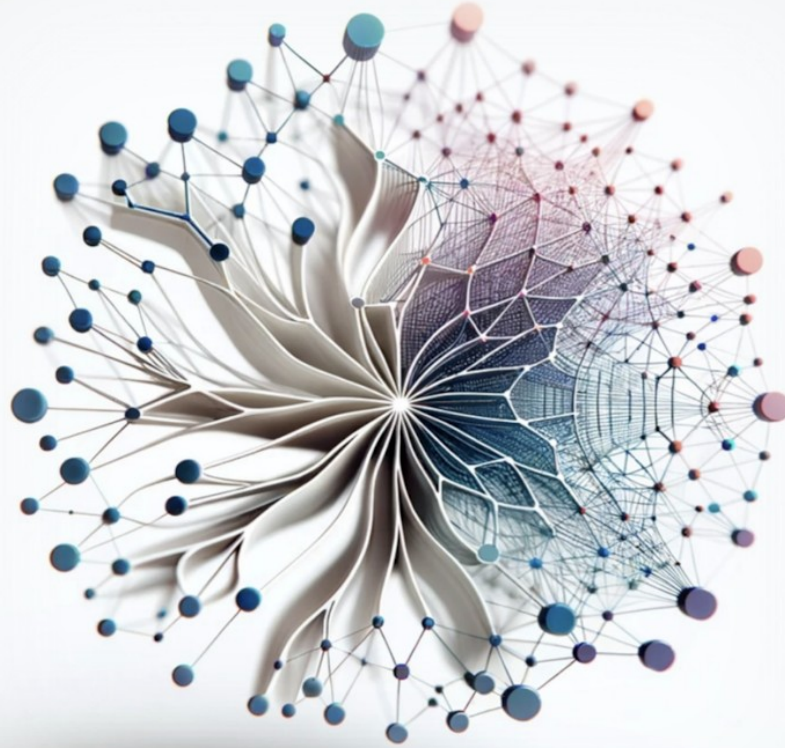

Okay, Google.

Vision

Machine Learning Systems with TinyML

Edited by Prof. Vijay Janapa Reddi
Harvard University

https://github.com/harvard-edge/cs249r_book

Tentative Agenda

- Day 1
 - Introduction to TinyML
 - Introduction to Vision Applications with TinyML
 - Lab: getting started with the Nicla, TinyML and Vision
- Day 2
 - Introduction to LoRaWAN
 - Introduction to MQTT
 - Lab: sending data from the Nicla to LoRaWAN and visualizing it via MQTT

Tentative Agenda

- Day 3
 - Develop your application and demo it!

Things will not work (we all have different operating systems, network setups, etc)

We will make things work together.

Please be nice to your colleagues and share your knowledge.

"What we have to learn to do, we learn by doing."

Aristotle

Please introduce yourself and let us know:

what is your interest in TinyML?

do you have a project/application in mind already?

have you worked with Arduino?

Thanks
